

1. Assessment of the Enhanced Army Global Logistics Enterprise (EAGLE) viability submission

The Government will review the potential Offeror's submission to determine, if the level of understanding, capability, resources and similar experience reflected in the submission when taken as a whole, demonstrates the Offeror's potential to be a viable competitor in the EAGLE acquisition and award of an EAGLE BOA. The Government will review submissions for viability based on an assessment of the following areas.

1.1.1 Understanding of the requirement to provide maintenance, supply, and transportation support services.

- Submission identifies an understanding of EAGLE maintenance, supply, and transportation support functions necessary to meet the EAGLE global logistics services requirement.

1.1.2 Understanding of the Single Logistics Provider (full service, prime contractor) requirement for maintenance, supply and transportation support services.

- Submission demonstrates the Offeror has the capabilities and resources to perform as a single logistics provider (full service, prime contractor) responsible for providing an integrated approach for delivery of all EAGLE maintenance, supply, and transportation support requirements. Any identified shortfalls or risks in the Offeror's capabilities and/or resources impacting the company's ability to meet the EAGLE requirements have been addressed to demonstrate the Offeror's ability to provide an integrated approach and perform as a full-service, prime contractor.

1.1.3 Teaming concept to meet the Single Logistics Provider (full service, prime contractor) requirement for maintenance, supply and transportation services.

- Offeror's approach to any identified teaming, joint ventures, subcontractors, etc., demonstrates the Offeror has the capabilities and resources to deliver all of the EAGLE requirements in an integrated approach providing maintenance, supply, and transportation services as a full service, prime contractor.

1.1.4 Similar Experience with potential EAGLE customers.

- Identifies similar experience for the prime and any team members, joint venture participants, subcontractors, etc., in providing EAGLE type requirements of maintenance, supply and transportation support services to Army, US Government departments and agencies, commercial, coalition partners, or foreign governments that may be customers for the EAGLE Program.

1.1.5 Similar Experience with equipment and missions.

- Identifies similar experience for the prime and any team members, joint venture participants, subcontractors, etc., in providing EAGLE type requirements of maintenance, supply and transportation support services involving combat, commercial, engineering, communications, armament equipment and associated materiel such as supply class I, II, III, IV, VII, IX and any experience with EAGLE-type missions.

1.1.6 Similar Experience with Standard Army Management Information Systems (STAMIS)/Automated Information Systems (AIS) operations.

- Identifies similar STAMIS/AIS operations experience for the prime and any team members, joint venture participants, subcontractors, etc., in EAGLE-type missions, providing maintenance, supply, and transportation support services.
