

*A major contracting center of the U.S. Army Contracting Command, Army Contracting Command-Warren provides global contracting support to Soldiers through the full spectrum of military operations.*

ACC-WRN is headquartered in Warren, Michigan, and co-located with the TACOM Life Cycle Management Command on the Detroit Arsenal.

ACC-WRN is one of five major contracting centers under ACC and serves as headquarters for five contracting offices located throughout the United States:

- Anniston Army Depot, Anniston, Ala.
- Detroit Arsenal
- Red River Army Depot, Texarkana, Texas
- Sierra Army Depot, Herlong, Calif.
- Watervliet Arsenal, Watervliet, N.Y.

The center employs 709 associates (including twenty-eight 923rd Contracting Battalion Soldiers) and manages more than \$138 billion in active contracts. The contracting center executed more than 31,000 contract actions obligating \$5 billion in fiscal year 2014.

ACC-WRN is customer-focused with goals related to customer satisfaction, contracting excellence, workforce and leadership development, and improving business processes.

Major customers include:

- Program Executive Office Ground Combat Systems
- PEO Combat Support and Combat Service Support
- System of Systems Engineering and Integration Directorate
- PEO Soldier
- PEO Ammo
- Joint PEO Chemical Biological Defense
- Program Manager Light Armored Vehicle
- TACOM Integrated Logistics Support Center
- Research, Development and Engineering Command; The U.S. Army Tank Automotive Research, Development and Engineering Center
- Foreign Military Sales Installation Management Command
- Army Headquarters Services
- Army Center of Military History
- Center for Army Analysis
- Other Services: Marine Corps, Navy, Air Force

The center provides comprehensive acquisition, contracting, business advisory, production support and depot-level maintenance services in acquiring, fielding, and sustaining systems and supporting requirements. It ensures the best products reach Soldiers when they need them, while providing fair opportunity for industry, including small businesses and obtaining the best value for the Army and other services.

ACC-WRN supports warfighters by procuring systems, research and development, repair parts and services for a diverse set of product lines through their life cycles:

- Combat and tactical vehicles
- Construction and material handling equipment
- Concept, research and development efforts
- Fuel and water distribution systems
- Small arms and targetry
- Fire control systems
- Chemical defense equipment
- Logistics and general support
- Base operation support and depot maintenance
- Public/private partnerships
- Sets, kits, outfits and tools
- Army diving program
- Sustainment of non-intrusive cargo inspection systems
- Optics
- Mine Resistant Ambush Protected vehicles
- Bridging

ACC-WRN is responsible for all contracting functions throughout the entire life cycle. This includes acquisition planning, contract execution and contract management.

*As of February 2015*
